

“...A collaborative, goal-oriented style of communication with particular attention to the language of change.

It is designed to strengthen **personal motivation** for and commitment to a **specific goal** by eliciting and exploring the person’s own reasons for change within an atmosphere of **acceptance and compassion.**”

What did you hear?

Change and Ambivalence

The Righting Reflex

Change Talk: Darn-CAT

Preparatory Change Talk

- Desire (I want to)
- Ability (I can)
- Reason (It's important)
- Need (I should)

Change Talk: Darn-CAT

Implementing Change Talk
Most predictive of positive outcome

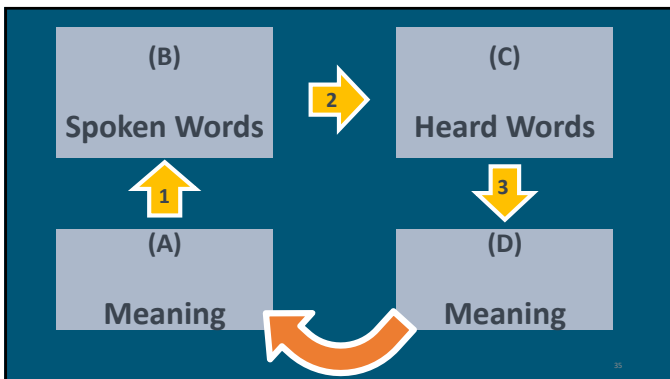

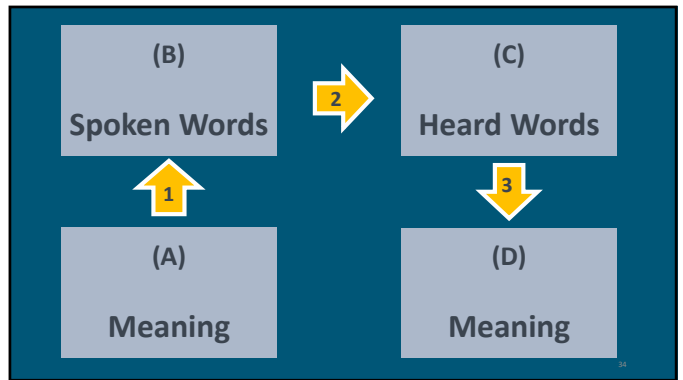

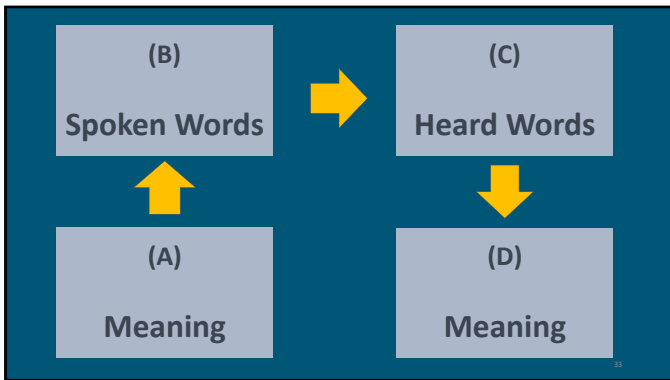

- Commitment (I will)
- Activation (I am ready, willing)
- Taking steps (specific actions)

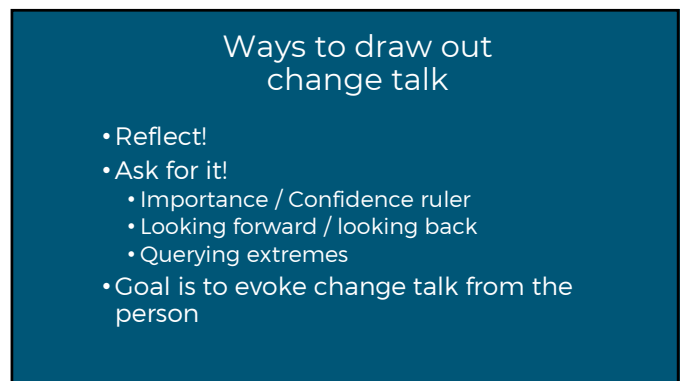

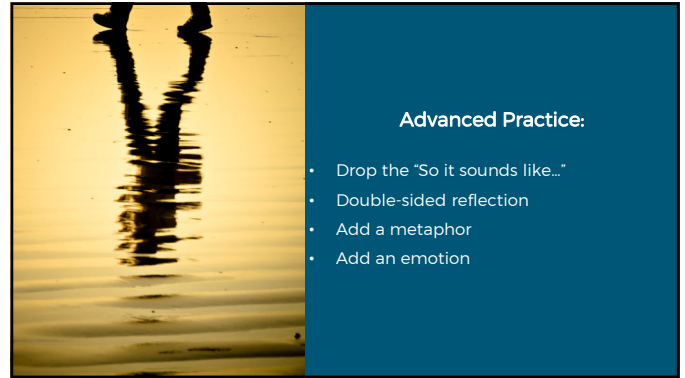

Listening for Change Talk

Reflection Statements

How **important** is this change to you right now?

0 1 2 3 4 5 6 7 8 9 10

Not *Somewhat* *Very*

How **confident** are you about making this change?

0 1 2 3 4 5 6 7 8 9 10

Not *Somewhat* *Very*

A Practice Conversation

Have a conversation: Speaker + Listener
 Find out the person's goal
 Ask re: reasons for wanting change
 Listen! Reflect, reflect

Observers:

- Listen for change talk statements
- Tally reflection statements

A note about ethics

Equipoise

An accomplishment (any size!)
of which you are proud

OR

The history of your name

Five
Basic

OARS + I

Open-Ended
Questions

Identifying
Open-Ended Questions

Affirmations

Identifying Affirmations

Asking Permission

- May I ...?
- Would it be okay with you if I ...?

Elicit – Provide – Elicit

E-P-E

E-P-E-P-E-P-E...

“Other Client” Statements

Menu of Options

and

Bite-sized information

Let's Practice

Putting it all Together: Another "Pair Up" Activity

Goals of Conversation

A "Taste" of MI

MI Counselor:

- Find out your partner's goal
- Ask re: reasons for wanting change

Counselee:

- Choose a topic ≈ Level 5-7 (out of 1-10)
- While talking, take pauses

MI Counselor AT END:

- Summarize **change talk** that you've heard
- Ask: So, what do you think you might do?

If giving advice, Remember:

MI Counselor

- **A**sk permission
- **G**ive menu of options / information / advice
- Follow up by **a**sking for partner's thoughts

Remember:

It's okay to ask for help if you get stuck

A Practice Conversation

Have a conversation: Speaker + Listener
 Find out the person's goal
 Ask re: reasons for wanting change
 Listen! Reflect, reflect
 Use Elicit-Provide-Elicit

Observers:

- Listen for change talk statements
- Tally reflection statements

73

Navigating the Conversation: The Four Processes

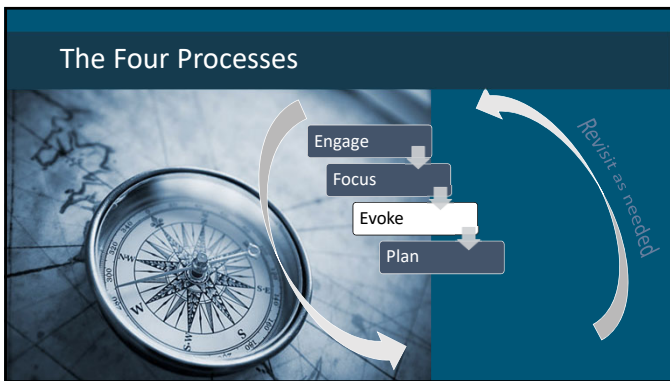

Roll with Resistance / Dance with Discord

- Especially in Engage process
- Explore – instead of challenge

Empathy

Understanding the
 circumstances,
 feelings, and
 expectations of the
 other

- Increased Commitment Language
- Decreased Ambivalence
- Resolve
- Experimentation / Taking Next Steps

Personalize the Plan

- Driven by client's expressed desires, reasons, and needs
- Not imposed from without
- If-then planning

"I expect you all to be independent, innovative, critical thinkers who will do exactly as I say!"

Behavior Counts

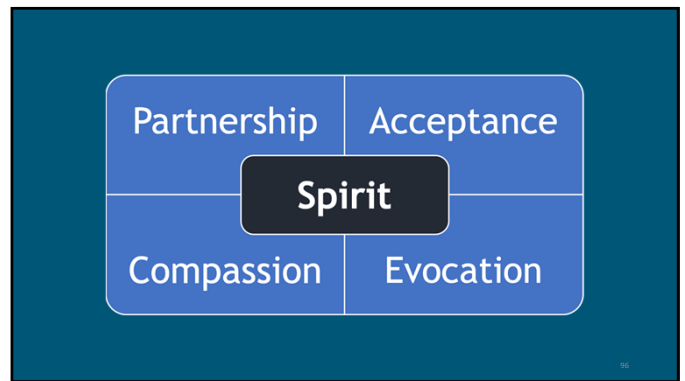

- Reflections
- Open-ended questions
- Closed-ended questions
- Reflections : Questions ratio

Let's think about...

The formula for the "MI Spirit"

Partnership

- Genuine agenda setting
- Curiosity about client's goals
- Client as expert
- Depends on client input
- Favors client strengths

97

Instead of:

I can understand that fear.
 I think that's a great idea of what to start with.
 I'm really proud of you.

Try:

You're afraid because ____.
 You're feeling confident starting with ____ will work well for you.
 You can be very proud of yourself.

98

Acceptance and Compassion

- Empathy
- Understands client's perspective
- Shows great interest
- Can guess at what has not yet been said
- Encourages elaboration

99

Empathy

Evocation

- Drawing out change talk (cultivate)
- Responds to change talk in a way that encourages exploration
- Expresses curiosity
- Explores values, strengths, hopes related to change

100

Putting It All Together

MITI 4.2: Motivational Interviewing Treatment Integrity

Global Measures

- Cultivating Change Talk
- Softening Sustain Talk

Relational Measures

- Partnership
- Empathy

Cultivating Change Talk				
1	2	3	4	5
Clinician shows no explicit attention to, or preference for, the client's language in favor of changing	Clinician sporadically attends to client language in favor of change - frequently misses opportunities to encourage change talk	Clinician often attends to the client's language in favor of change, but misses some opportunities to encourage change talk	Clinician consistently attends to the client's language about change and makes efforts to encourage it	Clinician shows a marked and consistent effort to increase the depth, strength, or momentum of the client's language in favor of change

Softening Sustain Talk				
1	2	3	4	5
Clinician consistently responds to the client's language in a manner that facilitates the frequency or depth of arguments in favor of the status quo.	Clinician usually chooses to explore, focus on, or respond to the client's language in favor of the status quo.	Clinician gives preference to the client's language in favor of the status quo, but may show some instances of shifting the focus away from sustain talk.	Clinician typically avoids an emphasis on client language favoring the status quo.	Clinician shows a marked and consistent effort to decrease the depth, strength, or momentum of the client's language in favor of the status quo.

Partnership				
1	2	3	4	5
Clinician actively assumes the expert role for the majority of the interaction with the client. Collaboration or partnership is absent.	Clinician superficially responds to opportunities to collaborate.	Clinician incorporates client's contributions but does so in a lukewarm or erratic fashion.	Clinician fosters collaboration and power sharing so that client's contributions impact the session in ways that they otherwise would not.	Clinician actively fosters and encourages power sharing in the interaction in such a way that client's contributions substantially influence the nature of the session.

Empathy				
1	2	3	4	5
Clinician gives little or no attention to the client's perspective.	Clinician makes sporadic efforts to explore the client's perspective. Clinician's understanding may be inaccurate or may detract from the client's true meaning.	Clinician is actively trying to understand the client's perspective, with modest success.	Clinician makes active and repeated efforts to understand the client's point of view. Shows evidence of accurate understanding of the client's worldview, although mostly limited to explicit content.	Clinician shows evidence of deep understanding of client's point of view, not just for what has been explicitly stated but what the client means but has not yet said.

Working toward proficiency

What else did you hear / notice?

What about the research?

- Over 1000 controlled clinical trials in many different fields
 - Addictions, mental health, chronic disease management, nutrition, preventative dentistry, public health, social work, corrections, education
- About 2/3 of trials show a beneficial effect
- Fidelity of MI practice predicts better treatment outcome
- Ability to learn MI unrelated to years of professional education

What about the research?

- Can be effective in brief formats
- In trials, MI is often a single session
- Used effectively in healthcare visits
- Adding single MI session at intake improves outcomes
- When MI is “added” to other evidence-based treatments, both become more effective

Small Group Discussion :
Continuing the Learning
&
Using MI in your Work

Small Group Discussion:
Using MI in your Work

- How do you think you might use MI after this training?
- What difficult conversations or “stuck” clients might benefit from MI?
- What MI tools are you interested in keeping / trying (agenda mapping, scaling questions, deeper reflections, elicit-provide-elicite, other?)
- What processes in your work may benefit from MI or an “MI sandwich”?

And of course... PRACTICE!
